Art Unit 1713

Applicant's election with traverse of Group V, claims 11-16 in Paper No. 8 is acknowledged. The traversal is on the ground(s) that a search of the elected subject matter would necessarily overlap the search of the non-elected invention. This is not found persuasive because the search areas for the inventions are quite divergent and the search for the transfer apparatus as elected does not overlap search for any of the non-elected inventions.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary

Art Unit 1713

skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-16 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hayes, U.S. Patent 6,210,764.

This patent shows film compositions which can be based on the instantly claimed metallocene catalyzed resin. See for example columns 5 and 6. Applicants' instantly claimed fillers are shown as being anti-blocking agents at column 7 lines 60+. The instantly claimed anti-static agents are shown at column 8 lines 55+. In view of this disclosure, applicants' claims are not novel.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter D. Mulcahy, whose telephone number is (703) 308-2449. The examiner can normally be reached on Tuesday through Friday from 7:30 A.M. to 6:00 P.M.

The fax telephone number for this group is (703) 305-3599.

Any inquiry of general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-2351.
